Hiring Manager

Britam

Nairobi, Kenya

Dear Hiring Manager,

I am writing to express my interest in the Developer position specializing in .NET Core and DevExpress XAF, as advertised. With a strong foundation in enterprise application development and a passion for building scalable, secure, and user-friendly systems, I believe I am well-equipped to contribute effectively to your team.

Over the past several years, I have delivered robust solutions across various industries, including CRM, e-commerce, and cloud-based platforms. My recent experience includes leading the development of a secure employee management application using C# and .NET, implementing role-based access control, and integrating with external APIs to enrich system functionality. I have also worked extensively with MS SQL Server, designing performant and normalized schemas, writing stored procedures, and optimizing queries to support real-time applications.

I have hands-on experience with DevExpress tools, including XAF, XtraReports, and the Dashboard suite, which I've used to streamline development cycles and create rich, consistent UI experiences across web and desktop applications. I am well-versed in LINQ, Entity Framework, and RESTful API design, and I follow best practices around clean architecture, secure coding, and Agile methodologies.

Your emphasis on collaboration with business analysts and project managers resonates with my approach to software development—bridging technical solutions with real-world business needs. Additionally, my familiarity with version control (Git), CI/CD pipelines, and platforms like Azure aligns well with your technical stack.

I would welcome the opportunity to contribute to your development efforts and bring value to your team. Thank you for considering my application. I am happy to discuss how my experience and skills align with your goals and would appreciate the chance to interview at your convenience.

Warm regards,

Felix Kiptoo
