**Hiring Manager**

MCB Group

Dear Hiring Manager,

I am writing to express my interest in the Infrastructure Engineer - DBA position within your Tech Infrastructure Chapter. With over six years of hands-on experience deploying and maintaining enterprise systems across Unix/Linux, Kubernetes, and cloud environments, I am confident in my ability to contribute effectively to the operational excellence and strategic goals of MCB Group's technology platform.

In my current role as a Senior Software Engineer at Griffin Global Technologies, I manage hybrid cloud deployments and containerized applications using tools such as OpenShift, Docker, and Azure. I also design and maintain CI/CD pipelines (Jenkins, GitHub Actions), automate infrastructure provisioning with Terraform and Ansible, and support mission-critical services with high availability and observability tooling. My background in scripting (Bash, Python, PowerShell) and experience with database technologies (PostgreSQL, MySQL) complement your needs for a robust, security-focused infrastructure engineer.

I'm particularly drawn to the opportunity at MCB Group because of your focus on innovation within financial services—a space where infrastructure reliability directly impacts millions of users. I thrive in collaborative, cross-functional environments and enjoy solving first-time or complex infrastructure challenges, especially where automation and scalability are key to long-term success.

Thank you for considering my application. I would welcome the opportunity to further discuss how my technical expertise and dedication to infrastructure excellence align with MCB Group's mission.

Sincerely,

**Felix Kiptoo**
